Outback Inverter 2500w

\$2195.00

Solar. Wind. Hydro. Generator. No matter what your energy source OutBack's products are engineered to provide your home or business with reliable electricity day-in and day-out. The OutBack modular system architecture allows your system to grow along with your power needs up to 36,000 watts. Power hungry appliances like washing machines, air conditioning and power tools are easily started by our inverter's substantial surge power capability. When not being used, the inverter enters a power save mode, which consumes as little as 3 watts, saving your battery power for when you need it the most. OutBack's innovative Maximum Power Point Tracking (MPPT) technology gets the most from your solar array or can also control hydro or wind turbine charging sources. Complete system status and control is easily monitored by a single control, instead of requiring the user to keep an eye on multiple displays and status indicators. The FX series uses a sealed chassis that can operate in the harshest environmental conditions such as high humidity and corrosive salt air. The VFX series uses a vented chassis with "bug proof" screened openings that allow high output AC power in the hottest of operating conditions. OutBack Power inverterchargers are the only choice when you need a true sinewave, powerful, modular and reliable power solution for your home, business or extreme application.

Features:

Sinewave output
Intelligent battery charging
Modular stackable design
High operating efficiency
Weather-resistant sealed chassis
Corrosion resistant internal components
Field serviceable
Integrated network communications
Standard 2-year limited warranty
